

New Year's Cup 2026

Foreword:

For the New Year's Cup 2026, we are using the regulations of the P&W Cup and the RCK Kleinserie from the 2025 season. The close reliance on these regulations is a deliberate choice to give as many drivers as possible the chance to participate in our race without having to purchase equipment that the driver is required to use exclusively for this race.

Please remember: We are at a trade fair and want to show the spectators how beautiful our sport is.

Regulations:

1. General Part:

- Qualifying Heats: 3
- Qualifying Heats: 5-7 minutes
- Final Heats: 3
- Final Heats: 5-7 minutes
- Ground Clearance: The ground clearance must not be less than 5 mm.
- Batteries: All 2S hardcase LiPo batteries with a maximum nominal voltage of 7.6 volts.
The batteries may only be charged up to a maximum cutoff voltage of 8.40 volts. They may only be charged with a suitable charger that includes an integrated or separate balancer. A LiPo safe is required for charging/discharging.

Heating the batteries during charging is expressly prohibited!

- Charging current: max. 12 amps
- Discharge current: max. 20 amps
- Adhesive: The use of commercially available, odorless adhesives is permitted. The adhesive must not leave any marks on the track surface.
- Multiple entries: is expressly permitted

The following also applies to all classes:

- Generally, anything not expressly permitted by the DMC regulations is prohibited for all racing classes.
- The listed weight applies to drivable vehicles after the race has ended. The organizer's measuring equipment is authoritative.

We wish all participants a lot of fun and hope that the set conditions ensure the fairest possible racing conditions.

2. Electric Touring Car Narrow EGTW Hobby

- Vehicles: All touring cars according to DMC regulations 2022 (EGTWMO/SP scale 1:10)
- Minimum weight: 1300g completely ready to run
- Motor: All 21.5T motors with fixed timing available in Germany.
NOT Allowed Hobbywing Xerun Justock 21.5T Brushless Motor No. HW-30408016-ETS
- Gear ratio: free
- Speed controller: All commercially available speed controllers with "Boost 0" mode are permitted.
The speed controllers to be used must be operated in "Boost 0" mode,
which must be clearly indicated by a flashing light on the speed controller/housing.
The speed controller must be installed in the unmodified original housing.
Painting or applying stickers to the housing is not permitted.
A rain cover is permitted. Swapping the speed controller, battery, motor, and
receiver cable is permitted.
- Tires: **A maximum of two sets are permitted for racing.**
All 28-inch hollow-wall tires available in Germany.
Rush 30CPM VR2 Premium Grip Order No. RS-RU0445
- Bodies: All commercially available touring car and GT bodies in the specified
scale. Spoilers and deflectors according to DMC. The spoiler of the body must not
exceed the upper edge of the roof.
Truck bodies are not permitted!

3. Electric Touring Car Narrow Front

- Vehicles: All vehicles according to the current DMC (H)EGTWMO with the exceptions of the P&W Cup regulations. Only the front axle may be driven.
- Minimum weight: 1250g completely ready to run
- Motor: Hobbywing XeRun Justock 3650SD G2.1 17.5T Fixed Timing
- Gear ratio: max. 4.5:1
- Speed controller: All commercially available controllers with "Boost 0" mode are permitted. The controllers used must be operated in "Boost 0" mode, which must be clearly indicated by a flashing light on the controller/case. The controller must be installed in the unmodified original case. Painting or applying stickers to the case is not permitted. A rain cover is permitted. Swapping the controller, battery, motor, and receiver cables is permitted.
- Tires: **A maximum of two sets are permitted for racing.**

RCK-28MX Indoor Complete Tire, Order No. RCK-230060
- Bodies: All commercially available FWD bodies.

4. Electric Touring Cars with M-Chassis

- Vehicles: Chassis: 1:10 M-Chassis exempt, 2WD and 4WD
Vehicles with independent front and rear suspension - no Pan Cars.
- Wheelbase: 210mm to 239mm
- Minimum weight: free
- Motor: RCK Flat-Six Turbo Brushless (240114)
- Gear ratio: max. 1:5.7
- Speed controller: RCK Flat-Six Turbo Brushless (240112)
- Tires: **max. 2 sets permitted for racing**
RCK standard tires in two different hardnesses.
Mixed tires permitted.
Only in conjunction with the included rims and inserts (pre-glued): 250201 (soft) and 250202 (medium).
- Bodies: According to the M-Chassis body list in the appendix, ONLY with a wheelbase that matches
the vehicle is permitted.
Other bodies are welcome upon request. The New Year's Cup organizing team will decide on approval.

A realistic appearance is highly recommended!!!

5. RCK Porsche Cup

- Vehicles: Tamiya TA02SW (236mm wheelbase)
Tamiya TA03RS (237mm wheelbase)
Tamiya TT01E (251mm wheelbase)
Tamiya TT02 (251mm wheelbase)

- Minimum weight: free

- Engine: RCK Flat-Six T Turbo Brushless (240114)

- Gear ratio: TA02SW max. 74:21 (8.59:1)
TA03RS max. 43:14 (8.51:1)
TT01E max. 63:19 (8.62:1)
TT02 max. 70:21 (8.66:1)
Shorter gear ratios are permitted.

- Speed controller: RCK Flat-Six Turbo Brushless (240112)

- Tires: **Max. 2 sets permitted for racing**
RCK Complete Wheel Cup 2R (250205)

- Bodies: According to RCK Porsche Cup regulations

Realistic appearance is mandatory!!!

- Tuning: According to RCK Porsche Cup regulations
